

ADVISORY SERVICES ESG REPORTING

Sustainability reporting is becoming increasingly important as companies and investors alike realize the financial impact and risk that environmental, social, and governance (ESG) factors may have on a business' future.

Due in part to the attention from the investment community, new ESG reporting instruments have recently emerged. However, without a clear set of regulated sustainability reporting standards, companies are spending a lot of time and resources on a multitude of disclosure questionnaires that may not provide the best return on their investment.

With the proliferation of sustainability reporting, it is now more important than ever for sustainability teams to prioritize reporting disclosures, find efficiencies in gathering quality data, and weave global data with a captivating narrative that shares the organization's sustainability journey.

EXPERT APPROACH

The UL EHS Sustainability Advisory Services team can offer guidance around the entire ESG reporting process and leverage the PURE® Sustainability system capabilities to capture responses for external disclosures. They can provide services including:

- Leading workshops to identify and align material issues with sustainability disclosure participation
- Reviewing composition of disclosures to determine the level of understanding on material topics
- Assessing extensibility of previous responses and best approach to responses on updated disclosures
- Mapping the value chain to highlight greatest areas of risk
- Providing guidance about investors' and rating companies' attention to ESG reporting

CLIENT BENEFITS

By partnering with UL EHS Sustainability Advisory Services, companies will be able to:

- Pinpoint the metrics that are most relevant in their industry and prioritize metrics in data collection and reporting
- Identify areas of improvement to increase transparency in reporting
- Highlight areas of improvement for cross collaboration and communication in the organization.
